Building a better world requires all hands on deck.

Sustainable ADA Contributor

If we are to ensure that Cardano's full potential is unlocked, education is the key.

With your help, together, we will be able to get more stories told. Provide more resources and help inspire a wider audience, worldwide.

As we are currently a small team, with a big vision and modest budget thanks to Project Catalyst and the support of voters through Funds 6 and 7, we are therefore offering what we see as a humble yet fair amount for fair work completed.

We have submitted several proposals in Fund 8 of Catalyst, and we hope to receive more funding with the help of the voting Cardano community.

We are actively working on developing projects and building a sustainable business model so that we can operate with a larger budget, and fairly compensate even more of our collaborators for their contributions, as we grow a global, decentralized Sustainable ADA team and community.

In addition to looking for native language speakers for proof reading/translation work, we are also looking for content creators. Perhaps you are an experienced writer/journalist/blogger? Maybe you're looking for a chance to improve your writing skills, whilst writing about topics that you're passionate about?

We can offer editorial support and guidance, help you develop your craft and refine your skills.
